

First Last

System Engineer

Systems Engineer with 9+ years of experience improving network operations by implementing disaster recovery strategies and configuring security systems. Key achievement: developed a RESTful API with Flask/Python on top of SQLAlchemy ORM layer, allowing 8.9K internal developers access to Growthsi data without exposing passwords, credit card numbers, and any critical information.

WORK EXPERIENCE

System Engineer

November 2015 – Present

Resume Worded, New York, NY

- Implemented disaster recovery solutions and achieved a 97% uptime for 15 servers of RW.
- Saved RW \$90K per quarter via extensive testing and meticulous system maintenance procedures.
- Introduced and implemented design optimizations to existing RW systems, slashing costs by 85%.
- Spearheaded plans and methods to establish new process guidelines which improved system performance by 90%.

Software Engineer

June 2013 – October 2015

Growthsi, San Francisco, CA

- Deployed a new feature in the flagship product of Growthsi that allowed over 10K customers to purchase multiple licenses at once, increasing revenue by 65% quarterly.
- Designed an automated testing framework using Python's unittest module which reduced manual QA time from 1 week to 30 minutes per release.
- Developed a RESTful API with Flask/Python on top of SQLAlchemy ORM layer, allowing 8.9K internal developers access to Growthsi data without exposing passwords, credit card numbers, and other critical information.
- Slashed development costs by creating reusable components like authentication modules, resulting in \$10M yearly savings for Growthsi.

Computer Technician

August 2010 – January 2013

Resume Worded's Exciting Company, New York, NY

- Installed and configured new computer hardware, software, printers, and networking equipment for 500 RW clients.
- Fixed damaged hard drives using data recovery tools to salvage critical company information, increasing client satisfaction rating by 35%.
- Designed an automated system that tracked employee time cards, saving RW 22 hours per week in payroll processing.
- Updated security patches on 300 company computers, preventing over 3K malware and virus attacks in 2011 alone.
- Maintained an up-to-date inventory of 5K computer parts in the warehouse worth over \$2M.
